

Turning **wastes** into  
**valuable compost**

water | hygiene | **environment**

# OCENE

## 30 years experience

to attest our know-how

Since 1976, OCENE specialises in the development, production and supply of professional system solutions and is leading provider for the foodservice, agricultural and industrial markets : agribusiness, beverage, brewery, pharmaceutical, dairy, meat, poultry and food processing industries.

Every day our men and women develop the most suitable solutions for water treatment, hygiene and environment.

Our know-how and professionalism have helped us expanding worldwide in the best conditions and with the cooperation of strong local partners.

## Business activities

### water

#### **OCENE, a safe bet**

Since its beginnings, OCENE helps you enhancing your farming performances thanks to water of good quality. Our know-how is also acknowledged in industrial circles. Our commercial and technical teams provide you support from identifying your needs to daily follow-up of your installations.

### hygiene

#### **A daily concern**

As a designer and maker of hygiene equipment OCENE can fit to your company's requirements. Our universe of solutions strives for a single goal: the quality of your products.

### environment

#### **Customized business solutions**

##### **>Effluent treatment**

Our engineering department develops your purification and treatment process. We provide you support to help you with the implementation of your project.

##### **>Composting**

Our composting process upgrades organic (industrial, farm) and household wastes so as to get a standardized product of quality. VALID® concept is a process approved by the relevant authorities.

##### **>Odor treatment**

Reduction and treatment of the olfactory nuisance is a case for a specialist. Our range of PROAXION® products and equipment meet your needs.

Automatic piloting system

Controlled ventilation

Mobile or stationary shredder

Conveying and mixing system

Automatic watering

Cover system

Smell processing

Maturation area (covered or not)

Air/Gas washer

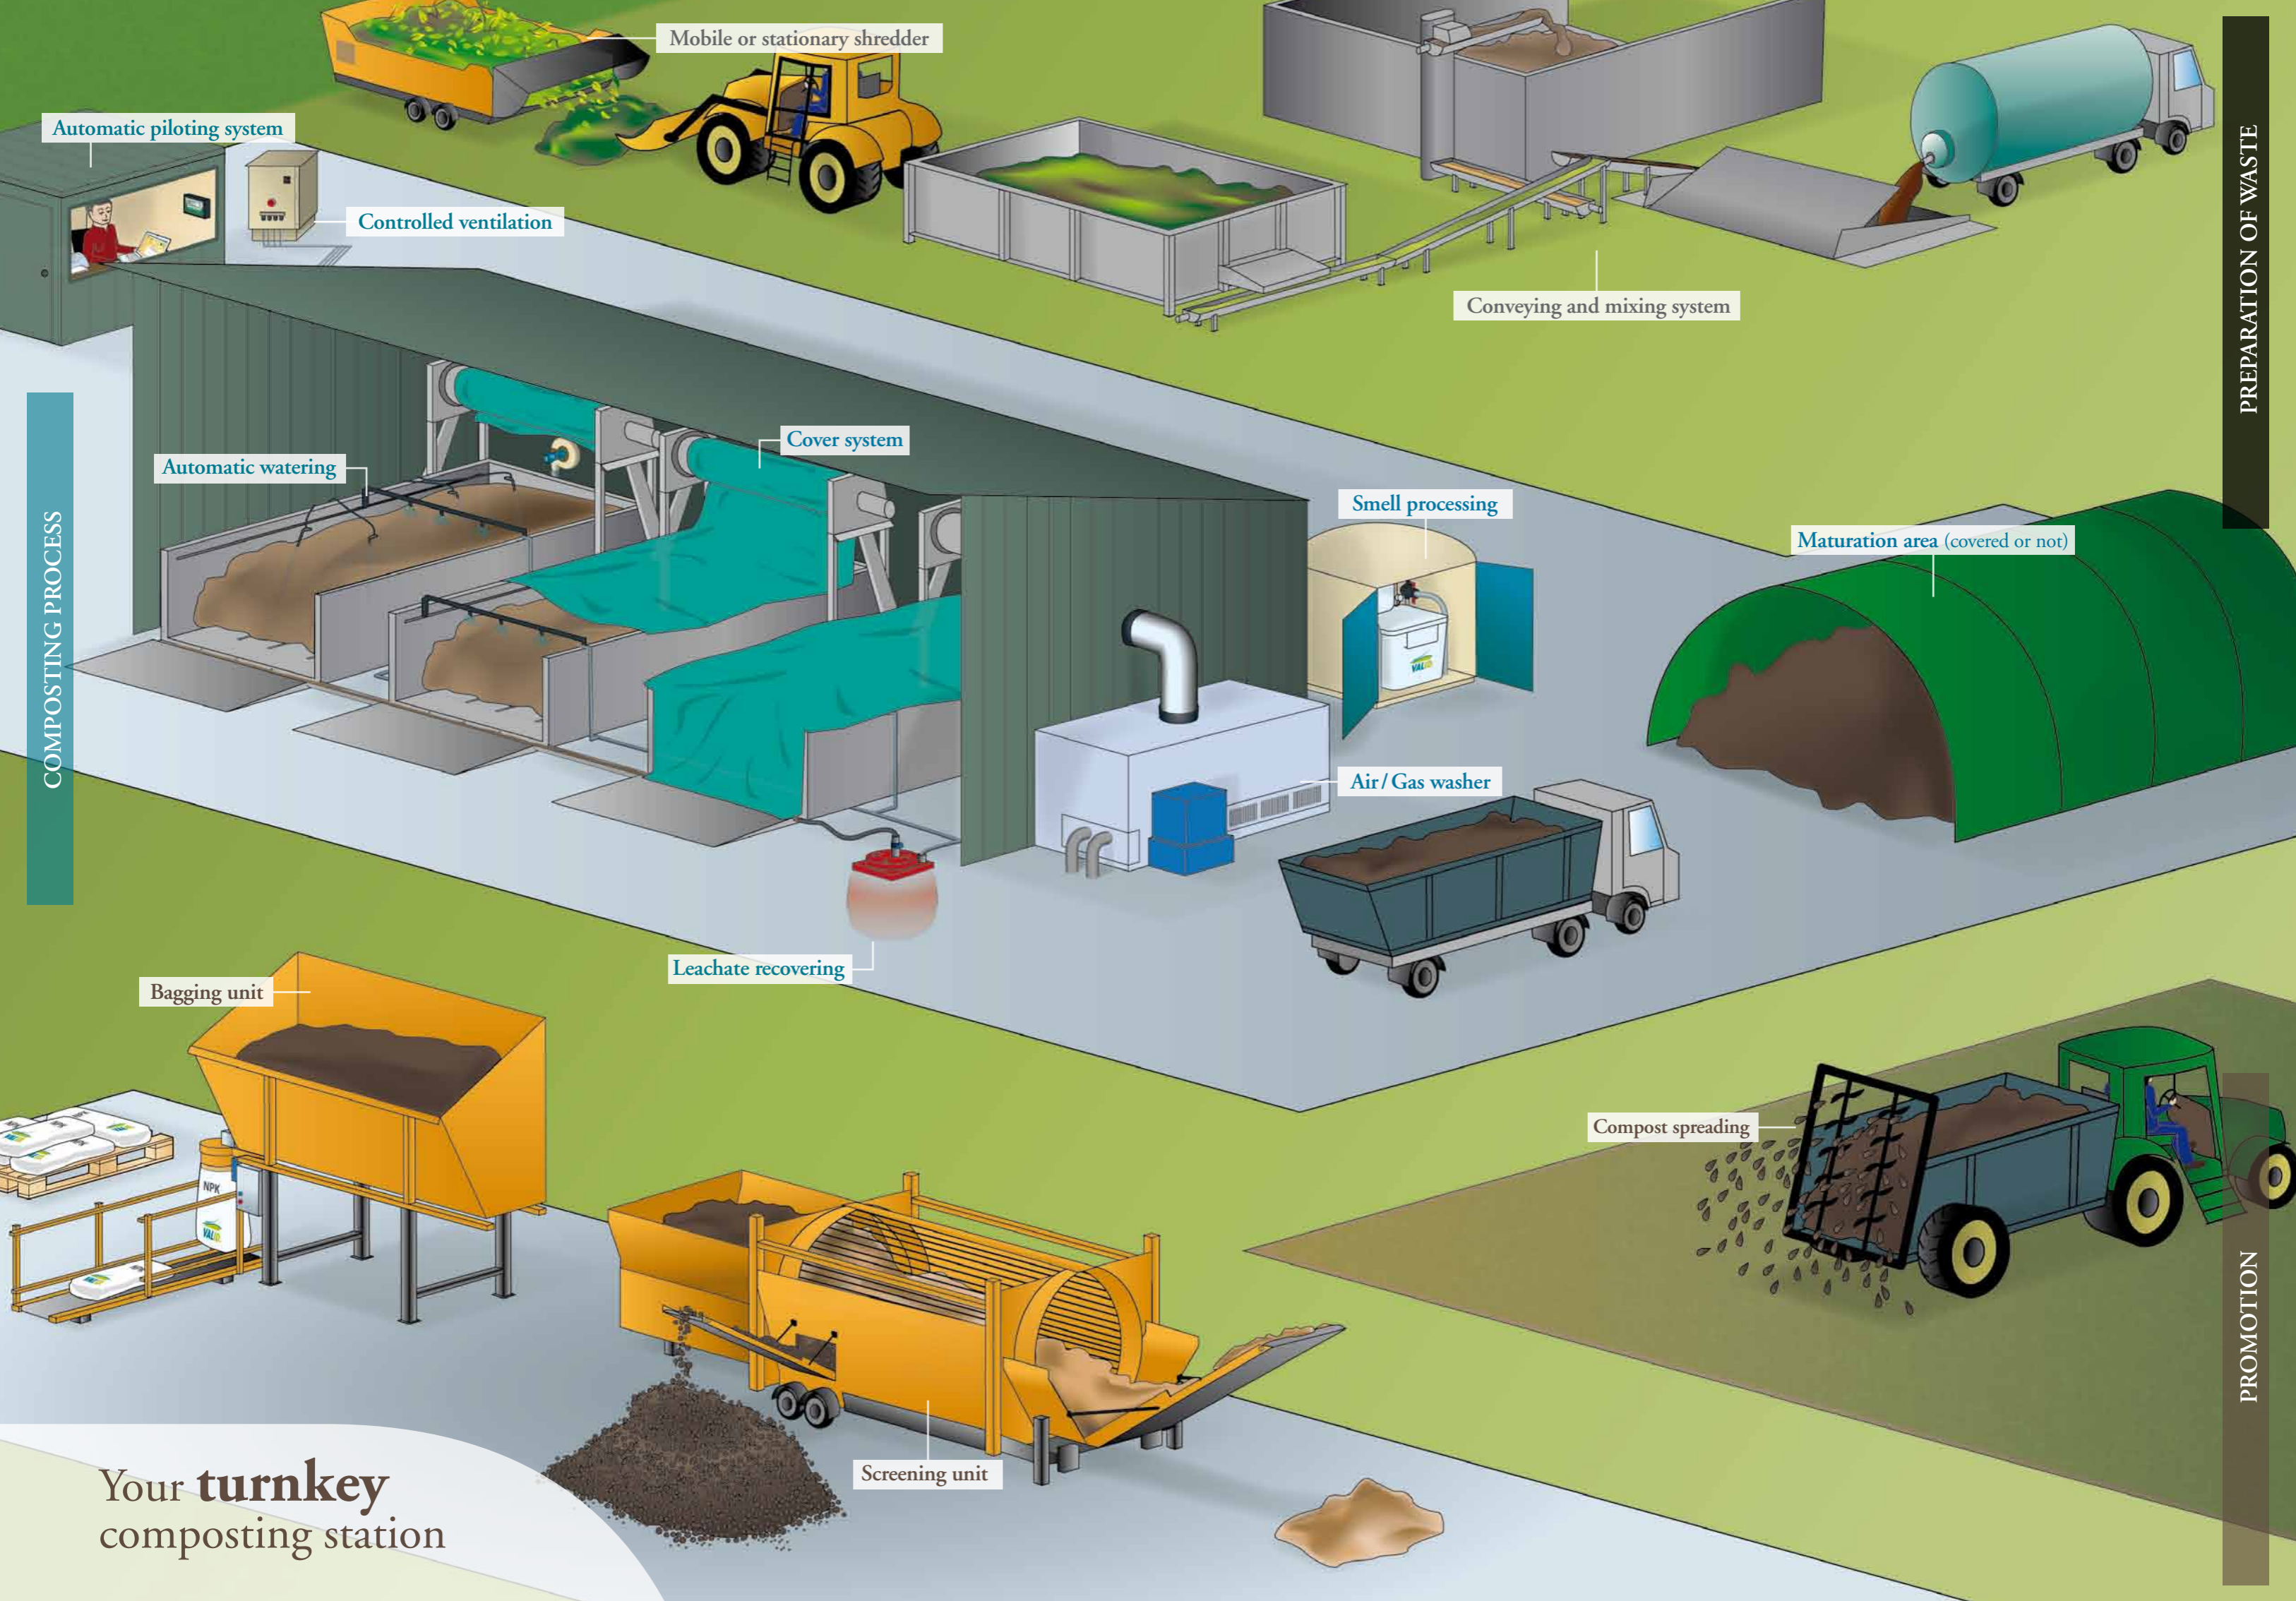

Leachate recovering

Bagging unit

Compost spreading

Screening unit

Your **turnkey** composting station

## innovative solutions...

### Engineering services

Our engineering department together with our field teams offer you custom-tailored solutions that allow you a quick return on your investment in your installation. VALID guarantees the success of your project thanks to:

- Feasibility study: Adaptation to the deposit and environment, designing, realization based on the specifications.
- Experimental procedure: analytical technical assessments, compostability tests, compressibility tests.

### Composting plan

Throughout the process, VALID helps you integrating it into your own composting procedures with specific monitoring tools:

- Procedure of use
- Bringing the station into service
- Compost's standardization
- Certification of the process by the relevant authorities

### Monitoring Software

Developed by our IT department, the VALI-COMPO software provides complete traceability and optimal management of your composting unit. To do so whatever the composting process used, it ensures the following functions:

- Treatment monitoring (ventilation, watering,...)
- Composting data recording
- Traceability upstream and downstream in the treatment process

## ....for a service of quality

### Customer Service

For any commercial or technical information, do not hesitate to contact us on: +33 (0)2.99.98.55.06

### Manufacture, installation and implementation

The VALID process whether it be on covered platforms, made on site or ready-built is put in place by our technicians; these experts ensure the starting and the controls.

### Support

Our provisions of service are in line with a lasting partnership with our clients.

- Training of the operators: developing process knowledge and versatility
- Technical support to the station's operating system.

### After-sale service

Throughout the life of your composting stations, our teams intervene in France and abroad to ensure their maintenance and repair.

Sell your compost

Quick profitability

No more visual or olfactory nuisances

Cheaper than any traditional solutions

# Turn your waste into money

## val'id in figures

350 STATIONS in operation in France and abroad

450,000 TONS OF WASTES processed yearly

## solution provider

### AGRICULTURAL

Manures (poultry, sheeps, cattle, horses...) | Droppings (poultry, rabbits...) | Phase separation's scraps | Slurries (mixing)

### INDUSTRIAL

Slaughterhouses' refuses (internal organs, stercoraceous materials...) | Feathers | Hatcheries' scraps | Fats | Sewage treatment plants' sludges

### REGIONAL AND LOCAL AUTHORITIES

Green materials | Sewage treatment plants' sludges

## unmatched advantages

### SAVINGS GENERATOR

Slump in labour cost | No consumables

### ENVIRONMENT FRIENDLY

No visual or olfactory nuisances | No seepages | Making of noble and sanitized product
